City of Salina Sanitation Collection Route Restructuring

City Sanitation is in the process of restructuring the sanitation and recycling collection routes. This change will affect the collection day for approximately 3,200 City Sanitation customers (about 22%) and around 200 recycling customers. The new collection route schedule is planned to take effect on **Monday, January 8, 2007**.

Over the past years, the growth of new customers has been uneven between the Monday – Friday collection routes, which has resulted in some collection days running longer and requiring overtime. The restructuring of routes will balance the completion times and reduce operational problems for collection crews. This change will also move all recycling customers into the same day as the regular sanitation collection routes.

For more information on this change and how it will affect your service, please call us at the **City of Salina General Services office at (785) 309-5750**. Note: See attached Map for detailed route location information.
