

**East Crawford Street and Fairdale Road  
Pedestrian Crossing Signal Replacement**

The City of Salina Public Works Department has hired L&S Electric LLC, to help replace the pedestrian crossing signals at the crosswalk on East Crawford Street near Fairdale Road.

The pedestrian crossing signals were damaged during the windstorm on December 15, 2021 and will need to have both the signal poles and concrete bases replaced before making it operational. Construction has already been scheduled, and staff will continue to work with the contractor during construction.

We continue to advise pedestrians to use the crosswalk located at the signalized intersection of East Crawford Street and Marymount Road for their safety until the crosswalk replacement is completed.
